No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1992 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTEMPORARY EDUCATIONAL PSYCHOLOGY

INFORMATION FOR AUTHORS

Contemporary Educational Psychology publishes articles dealing with empirical research and theory in psychology as related to the educational process. Since the process of education is a lifelong one, materials should reflect the several life phases from neonatal to senescence and death; however, these stages are reflected in an educational framework. Articles and reviews must show a clear relationship to the process in topic, data, and theory.

Specifically, the Journal contains articles that demonstrate the application of psychological methods and skills to the educational process. Both classroom and laboratory experimentation are relevant, particularly as they emphasize problem-solving. Instructional techniques may be reported, if adequate controls are used to demonstrate the validity of the findings. Theoretical contributions may include issues, comparisons, analyses, and the like as appropriate content.

A research critique of a selected educational topic and conclusions about implications for the field will be included as space permits. For instance, the topics selected for critique will reflect extensive research over a period of several years, so that consistency in findings and applications in the practical state may be explored.

The content of *Contemporary Educational Psychology* allows the identification of educational problems, both in and out of school, and relates the content of each issue to these problems.

Manuscripts for consideration should be submitted in quadruplicate to the Editor, Raymond W. Kulhavy, *Contemporary Educational Psychology,* Psychology in Education, Arizona State University, Tempe, Arizona 85287-0611.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Contemporary Educational Psychology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Accepted manuscripts should be prepared on high quality bond paper with wide margins, using double spacing throughout. Four copies should be submitted; each copy must include all figures and tables. Each page of the manuscript should be numbered. The first page contains the article title, author's name, affiliation and address to which correspondence should be sent. Authors should not place their names on the manuscript itself. The second page should contain an abstract of not more than 150 words.

Authors are requested to follow the instructions given in the *Publication Manual of the American Psychological Association,* 3rd edition, 1983.

Abbreviations and Symbols. Do not use final periods with units of measure that are abbreviated (cm, s, kg, etc.) in the text or in tables, except for "in." (inch). Underline letters that represent mathematical symbols; these will be set in italic type. Unusual symbols should be identified in pencil in the margin the first time they appear.

Figures and Tables. All illustrations are to be considered as figures, and each graph or drawing should be numbered in sequence with Arabic numerals. Each figure should have a

descriptive legend, and these should be listed on a separate sheet of paper. Figures should be planned to fit the proportions of the printed page (4½ × 6¾ in.), and care should be taken that lettering on the original is large enough to be legible after a reduction of 50–60%. The original artwork should accompany the mansucript for photographing. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text and placed at the end of the mansucript. All tables should have descriptive headings, typed double-spaced, above the table. Footnotes in the text should be identified by superscript numbers and listed consecutively on a separate page.

References. Literature references in the text should be cited by the author's surname and the year of publication, e.g., Roe (1980); Roe *et al.* (1981); Roe and Jones (1983, p. 150) (for reference to a specific page). If a reference has more than two authors, the citation includes the surnames of all authors at the first mention, but later citations of the same reference include only the surname of the first author and the abbreviation "et al." Suffixes a, b, etc., should be used following the date to distinguish two or more works by the same author(s) in the same year, e.g., (Roe, 1984a, 1984b). Literature citations in the bibliography should be arranged alphabetically according to the surname of the author. Journal titles should be written out in full rather than abbreviated. Please note the style of capitalization and punctuation for journal articles, books, and edited books in the following examples:

Biggs, J. B., & Collis, K. F. (1982). *Evaluating the quality of learning: The SOLO taxonomy*. New York: Academic Press.

Curry, L. (1984). Student commitment and school organization in relation to on-task behavior and achievement. *Contemporary Educational Psychology*, **9**, 171–184.

Donchin, E., Ritter, W., & McCallum, C. (1978). Cognitive psychophysiology: The endogenous components of the ERP. In E. Calloway, P. Tueting, & S. Koslow (Eds.), *Brain event-related potentials in man* (pp. 349–441). New York: Academic Press.

Siegler, R. S., & Robinson, M. (1982). The development of numerical understandings. In H. W. Reese & L. P. Lipsitt (Eds.), *Advances in child development and behavior* (Vol. 16). New York: Academic Press.

Proofs. Proofs will be sent to the author with reprint order forms. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying the proofs.

Personal Computer Disks. Manuscripts may be submitted to *Contemporary Educational Psychology* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).
